

I. Status:

A. Full-time: must be completed in 2 or less years

-9 credits per term is a minimum to be considered full-time by Concordia;
some International students require 12 credits-consult the International
Student Office if you are not sure of your own situation

B. Part-time: must be completed in 4 or less years

II. To complete program in 8-9 months:

Fall term courses:

Biol515, 511, 512, PHIL530-3 credits each
Biol516 (6 credits; a fall/Winter course)

Winter term courses:

Biol510, and 3 of 521, 523, 524 OR CHEM 678
Biol516 continued

III. Full-time, but complete the program in 3 terms and spread out the course load:

Fall: Biol515, 511, 512
Winter: Biol510, 521, 523, 524
Fall: PHIL 530, Biol516****

In this case, Biol516 MUST be started in the preceding summer, to allow 8 months of
time for the project. Registration is for the Fall term however.

There are other scenarios that can be done to spread the load over 3 terms,. G=For
example, PHIL530 and Biol515 can be interchanged. However, Biol511 and 512
MUST be taken in the first Fall term; Winter courses require completion of these
two courses.

IV.

Part time-1-2 courses can be taken per term. Again, Biol511 and Biol512 are
recommended for Fall term, as they are prerequisite courses for all other Winter
courses.
